Kiran Gobi Manivannan

Toronto, ON • 437-838-5167 • kiranxgobi@gmail.com • linkedin.com/in/kirangobimanivannan/

PROFESSIONAL SUMMARY

Data science and machine learning professional with a Post Graduate Diploma in AI & Machine Learning and a B.E. in Computer Science, with hands-on experience in Python, SQL, scikit-learn, and Power BI. Automated data-processing workflows that cut manual effort by 20%, built an NLP classifier that reached 85% accuracy and improved F1-score by 9%, and prototyped LLM-based applications. Skilled at cleaning and validating high-volume data and turning it into reliable reporting.

TECHNICAL SKILLS

Programming & Data Processing: Python, SQL, JavaScript, Workflow Automation, Exploratory Data Analysis, Data Cleaning, Data Preprocessing, Data Profiling, Data Validation

Analytics & BI: Power BI, DAX, Tableau, SAS, Excel, Data Visualization, Operational Reporting

Machine Learning & AI: Scikit-learn, Random Forest, SVM, Classification, Feature Engineering, Model Evaluation (Accuracy, F1-score), NLP, TF-IDF, Sentiment Analysis, Computer Vision, Generative AI, LLM APIs (ChatGPT API, Claude, Gemini), Open-Source LLMs, Multi-Agent Systems (Agentic AI)

Engineering & Automation: REST APIs, API Integration, ETL Design, Docker, Git

Tools: Jupyter Notebook, VS Code

Domain: AML and Financial Transaction Data (LCTR, EFT, STR), Quality Control, Case Management

PROJECTS

Resume Suitability Prediction System | Python, scikit-learn, TF-IDF, Random Forest — Apr 2025

- Built an NLP resume–job fit classifier that reached 85% accuracy on a test set of 1,000+ resume–JD pairs.
- Compared Random Forest and SVM models and raised F1-score by 9% through feature tuning and text preprocessing.

AI Object Detection & Contextual Query System | Computer Vision, API Integration, LLM — Jul 2025

- Designed an object-detection and LLM reasoning pipeline, with API communication between the user interface and the inference engine.
- Structured the system architecture for image capture, object selection, contextual reasoning, and model inference.

PROFESSIONAL EXPERIENCE

Data Operations Analyst — AML Shop, Toronto, ON — Jul 2026 – Present

- Process and validate high-volume, confidential financial transaction data (LCTR, EFT, STR-related, source-of-funds, and payment records) in AML case-management systems, maintaining accuracy, completeness, and consistency.
- Run quality-control checks to catch missing or inconsistent records and correct errors, keeping case data reliable for reporting.

Artificial Intelligence & Machine Learning Intern — Ethosight AI, Toronto, ON — Jan 2025 – Aug 2025

- Cleaned, validated, and preprocessed operational and AI decision datasets using Python, SQL, and Excel to prepare data for analysis and reporting.
- Profiled datasets and ran data-quality assessments to surface inconsistencies and improve the reliability of insights from case-study data.
- Applied machine learning and analytical techniques to evaluate algorithm transparency and decision-making behavior in AI systems.

Programmer Analyst — Cognizant Technology Solutions, Chennai, India — Feb 2022 – Nov 2023

- Built Python automation scripts for data-processing workflows, reducing manual effort by 20%.
- Integrated REST APIs to automate data exchange between internal platforms and third-party systems.
- Developed rapid AI prototypes using LLM APIs for document summarization and query automation.

EDUCATION

Post Graduate Diploma in Artificial Intelligence & Machine Learning — Jan 2024 – Aug 2025
Lambton College, Toronto, ON

Bachelor of Engineering in Computer Science — Mar 2018 – May 2022
St. Joseph’s College of Engineering, Chennai, India
